120 YEARS OF QUALITY
YOU CAN COUNT ON

Overview

South African born and bred, PG Bison's proud heritage stretches all the way back, over 120 years, to humble beginnings in 1897.

Focused on building a reputation for excellence and ensuring winning partnerships, we have grown to be one of Africa's largest manufacturers of particleboard, medium density fibreboard and decorative wood-based panel products.

At the core of PG Bison's success lies the drive and dedication of nearly 2,000 employees who share the common vision of building a business that is regarded as one of South Africa's most esteemed industrial companies.

PG Bison stands for manufacturing of an international standard, backed by unrelenting quality and world class industry experience and equipment, producing products our customers can trust.

PG Bison (Pty) Ltd is 100% owned by KAP Limited, a Johannesburg Stock Exchange (JSE) listed company.

Grow With Us

At PG Bison, we strive to operate both responsibly and sustainably. Focusing our efforts in the right places helps us build a better tomorrow, while ensuring stable and consistent product supply, so our customers can plan and grow with confidence.

Our efforts focus on four pillars

- s** source — Our raw materials
- o** output — Our products
- i** internal — Our company
- l** living — Our communities

We do this by:

- adopting environmentally responsible practices;
- ensuring compliance with legal and other requirements;
- monitoring, reviewing and continually improving our performance; and
- investing in programmes to empower communities

Fibre Security

Wood fibre is a key ingredient in our products. We source our fibre from our own and other responsibly and sustainably managed resources within South Africa.

We manage our own plantations’ sustainability by implementing environmentally sound principles and adhering to best forestry practices to help minimise any possible environmental impact. We also belong to Forestry South Africa (FSA).

PG Bison’s plantations, North East Cape Forests (NECF) and Southern Cape are Forest Stewardship Council® (FSC®) certified. Our manufacturing plants are not currently FSC® certified.

PG Bison Plantation Split

North East Cape Forests	79%
Southern Cape Forests	21%

North East Cape Forests (NECF)

Certificate number:	SGSCH-FM/COC-011207
Licence number:	FSC-C139494

Southern Cape

Certificate number:	SGSCH-FM/COC-012032
Licence number:	FSC-C176427

The mission of FSC® is to promote environmentally appropriate, socially beneficial and economically viable management of the world’s forests. You must be in possession of a valid FSC® Chain Of Custody (COC) Certificate to sell your products under the FSC® mark. For more information on FSC®, please visit www.fsc.org/en

Low Emissions

Internationally, urea formaldehyde (UF) is the most common resin used in wood-based panel manufacturing because it is both strong and cost-effective.

UF contains formaldehyde, a common organic compound (CH₂O) and volatile organic compound (VOC), occurring naturally throughout the world. Exposure to high levels causes watery eyes, burning sensations in the mucous membranes, skin rashes and allergic reactions. Excessive, prolonged or long-term exposure is speculated to be carcinogenic by some authorities.

As resin technology improves over time, emission levels are reduced. Emission levels also decline with age. By surfacing particleboard or medium density fibreboard (MDF) with a high pressure laminate (HPL) or with melamine-impregnated decor paper as a melamine faced board (MFB) and sealing the edges with edge banding, formaldehyde emissions can be reduced by as much as 95%.

Free formaldehyde, from the production of wood-based panel products, is measured according to international test methods.

**Formaldehyde Potential (Perforated Value)
in accordance with EN 120:**

Class 1 (E1):	≤8mg/100g
Class 2 (E2):	>8mg/100g but ≤30mg/100g

PG Bison manufactures E1 product on a Made To Order (MTO) basis. Please check with your local sales representative regarding availability.

PG Bison is the only manufacturer in South Africa able to test, certify and independently verify its own E1 board production in-house. This was made possible by enlisting the assistance of Fraunhofer, Europe’s leading application-oriented research organisation. The independent, external authority audits the PG Bison laboratories biannually.

For our E1 compliance certificates, please visit: <https://www.pgbison.co.za>

Quality Assurance

PG Bison manufactures to international standards, using sustainably managed timber and high-quality resins. Together with our continuous investment in the latest technology, our wealth of experience and technical expertise, PG Bison is able to ensure consistent quality.

PG Bison manufactures BisonBord® and SupaWood®, at three sites, all of which use the world’s latest Conti-Press technology. The continued investment in technology means PG Bison is able to manage costs and still meet the required performance standards, so PG Bison products perform exactly as you would expect, time after time.

ISO Certification

To demonstrate our ability to consistently provide products that meet customer and regulatory requirements, we have implemented the ISO 9001 system at all three board manufacturing sites.

Boksburg	Certified as of May 2021 – valid until May 2024
Piet Retief	Certified as of August 2020 – valid until August 2023
Ugie	Certified as of April 2021 – valid until April 2024

PG Bison’s QMS is audited by SGS South Africa (Pty) Ltd.

ISO 9001: 2015
is the international standard that specifies requirements for a quality management system (QMS).

Local Content

PG Bison manufactures all its products at the following sites within South Africa:

	BisonBord (Particleboard)	SupaWood (MDF)	MelaWood (Decorative MFB)	DecoBord (Paper Foiling)	BisonLam (White MFB)	SupaLam (White MDF)	Formica LifeSeal (Worktops)	MelaWood SupaGloss (Hot Coating)	MelaWood SupaMatt (Hot Coating)	Resin (UF & MF)
Boksburg, Gauteng		x	x	x		x		x	x	
Piet Retief, Mpumalanga	x		x		x					x
Ugie, Eastern Cape	x		x		x		x			

90%
The total weight of particleboard and MDF made up by wood fibre.

Local Fibre
The fibre content for all three sites is locally sourced. All sources of fibre used are strictly controlled and permitted by the Department of Forestry, Fisheries and the Environment (DFFE).

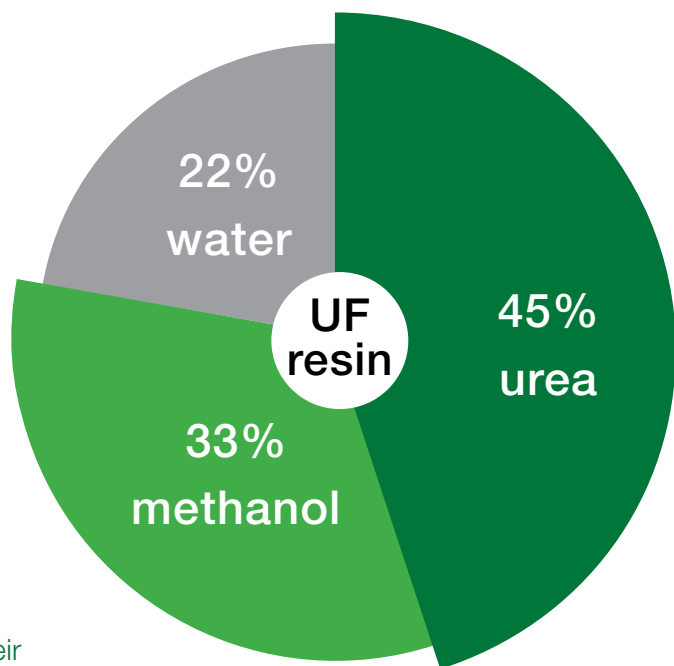

Decor Paper
The decorative papers for MFB are imported as there is no local supply that meets our needs. The decor paper is treated, at PG Bison's Paper Impregnation Plant (PIP), with melamine formaldehyde (MF) and UF resins, both produced locally by Woodchem. Decor paper adds < 1% to the total weight of the end product.

Proximity
The Ugie board plant sources fibre from its own plantations in the surrounding region as well as post-industrial activities. The Boksburg and Piet Retief board plants source fibre from third party plantations and post-industrial activities, in close proximity to the sites.

Resin
The remainder of the board's weight is made up by additives and UF resin to bind the fibres together.

Urea is imported from the Middle East as there is no local supply that meets our needs

Methanol is sourced locally.

All three sites source their UF resin from PG Bison's sister company Woodchem, located in Piet Retief.

PG Bison is a member of Proudly South African and has been verified as utilising a 95% level of local content and local labour in its production processes and activities.

PG Bison is committed to educating and upskilling individuals to assist them in having a brighter future. In support of this, we conduct learnerships, apprenticeships and internships across various areas within the business.

Broad-Based Black Economic Empowerment (B-BBEE)

B-BBEE is a government-led initiative aimed at transforming the South African economic landscape and achieving the upliftment of its society.

PG Bison is proud to be the first and only wood-based panel manufacturer in South Africa to have undergone the audit and receive verification of its B-BBEE status.

Responsibility

Our own success is inextricably linked to the sustainable growth and development of the communities in which we operate. We invest in programmes to empower these communities through their own development.

We concentrate our efforts on the most impoverished communities around us, focusing on technical, social and life skills development; grassroots sports development; and environmental educational and sustainability issues.

We partner with non-profit organisations, local farmers and businesses to establish programmes like feeding schemes, which in turn support local crèches, by distributing meals to pre-school children. In Ugie, five vegetable tunnels have been established to supplement the food parcels. By erecting vegetable tunnels at Early Childhood Development centres, we teach the children how to grow their own food from an early age. The local community manages the vegetable tunnels.

PG Bison, as a division of KAP Limited, has a B-BBEE level. For our current certificate and level, please visit: <https://www.pgbison.co.za>

Ensuring It's PG Bison

Whenever something is really popular, there's a chance somebody is going to copy it. Counterfeit products and passing off is a problem in many industries, as unscrupulous third parties fraudulently use the branding or trademarks of another business to trade off of its good reputation.

Counterfeit interior wood-based panel products may appear the same as branded ones, but they can fail to meet expected performance and durability tests because they don't adhere to the same quality standards.

PG Bison's product standards are ensured by extensive research and testing, and by using only quality materials in our production processes.

Be aware of counterfeit products in the market. Copying the trademarks, brands and colours registered and owned by PG Bison and passing them off as genuine PG Bison products is illegal. But more than this, counterfeiting our trademarks, brands and products places our customers at risk and undermines our investment in the market and the brands we supply.

How To Check For Authenticity

When purchasing products, please ensure:

- PG Bison production stamps on the edges of the full sized boards
- The production stamps carry the specific PG Bison brand, e.g. MelaWood, BisonLam, SupaMatt, SupaTexture and SupaGloss. Formica LifeSeal worktops are stamped on the underside.
- The boards carry the Proudly South African logo on their stack labels.

If you have any doubt, please contact your local PG Bison sales representative in your region.

Certificate SGSCH-FM/COC-011207

The Organization

NECF PG Bison a division of KAP Diversified Industrial (Pty) Ltd

North East Cape Forests, Private Bag X1, Ugie, 5470, South Africa
